

**STRUMENTAZIONE
INDUSTRIALE SRL**

The right measure

**STRUMENTAZIONE
INDUSTRIALE SRL**

Company profile

Strumentazione Industriale: solutions for the measurement and regulation of pressure, temperature, flow, level and ph

RAPID DELIVERY

24/48h for instruments
ready in stock

CALIBRATION REPORT

Certified laboratory iso 9001:2015

DIAPHRAGM SEAL MOUNTING

Rapid service

Strumentazione Industriale: solutions for the measurement and regulation of pressure, temperature, flow, level and ph

- Over 80.000 pcs **ready in stock**
- **Customized** solutions and stock
- Since **1987**
- System certified **UNI EN ISO 9001:2015** also for the issue of calibration reports
- **DUNS NUMBER 654936673**

Our history

1987

Strumentazione Industriale is established. It becomes a partner of important Italian manufacturers for which it develops the northern Italian market.

'90

The company expands its areas of expertise and, perceiving the importance of prompt delivery, constitutes a warehouse of instruments, which is constantly growing and evolving.

1998

Strumentazione Industriale obtains the ISO9001 certificate also for the issue of calibration reports. A new laboratory is created for the assembly of diaphragm seals and customized executions. Participation to international fairs.

2005

New warehouse in Gozzano, increase of models and quantities in stock. Strumentazione Industriale has customers in Italy and about 20% abroad. Creation of a capillary commercial network.

2014...

Moving to the new Inverio headquarters. Installation of automatic warehouses. Specific training courses for customers and distributors. A team of technical advisors for new projects. Export all over the world.

Rapid delivery

- Over 80.000 pcs in stock
- Shipments in 24/48 hours for hundreds of codes
- Automatic warehouses
- You can check stock availability if you log-in our website at the address www.strumentazione.com or if you contact our customer care (+39(0)322 259233 / info@strumentazione.com)
- Collaboration with logistic partners for fast shipments

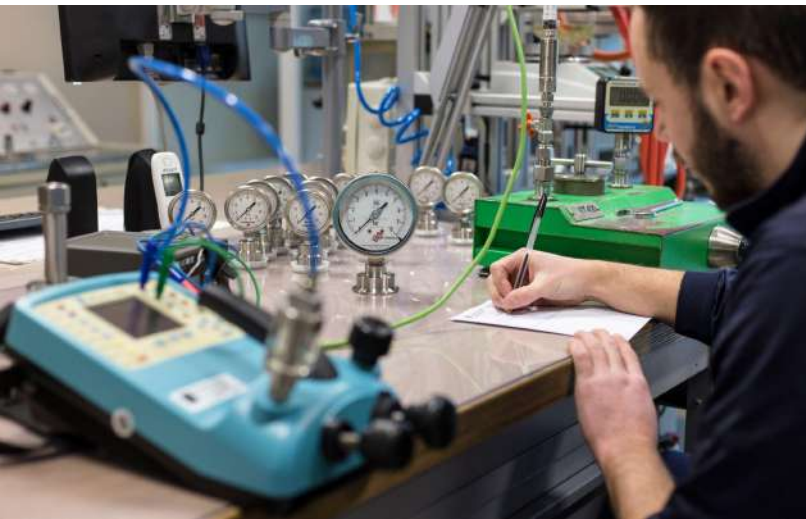

Flexibility and customized solutions

- Our customers can minimize storage costs by taking advantage of our stock
- Creation of customized stocks: an area of the warehouse is dedicated to specific customers' needs
- Less stops in production: thanks to the fast delivery service, our customers can get spare parts in a very short time
- Less management costs: low turnover items are also available for immediate delivery
- Non stock items are manufactured according to customer's technical specifications, allowing us to offer a wide and complete range of measurement solutions. This allows our customers to reduce the number of suppliers and combine shipments.

Calibration service

Our laboratory is **certified UNI EN ISO 9001:2015** also for the issue of calibration reports with reference to master primary instruments.

- Issue of calibration reports in a few days
- Supply of instruments complete of calibration reports
- Re-certification of instruments, after functional check and prior to offer
- Mechanical and digital test instruments, complete of calibration report, ready in stock
- Pressure and temperature calibrators, for laboratory or portable

Diaphragm seal mounting

In our laboratory we assemble diaphragm seals on pressure gauges, switches and transmitters.

Delivery in few days.

- Instruments available in stock can be assembled and shipped in **one week**.
- We **mount diaphragm seals on customers' instruments** in one week from the receipt
- We **replace** damaged diaphragm seals: customer can save money by changing only the diaphragm seal if the transmitter is still working

Diaphragm seal mounting

Design and manufacturing of diaphragm seals on specific customer request, also in special materials (Hastelloy, Monel, Tantalum..). Diaphragm seal mounting also on customers' instruments.

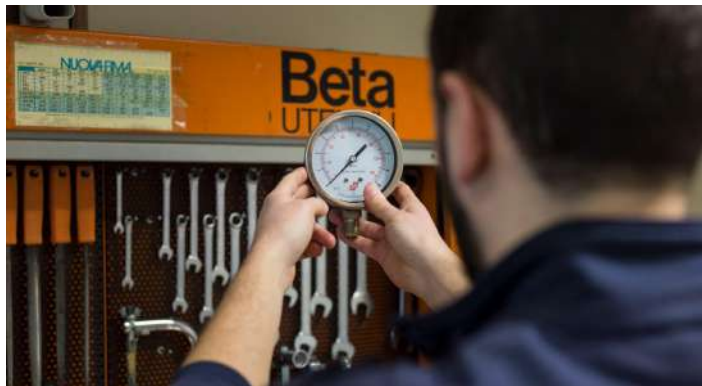

- Filling of the circuit with “**FDA APPROVED**” oil, adapt for the most applications, included sanitary ones.
- For specific applications, with very high or low temperature, filling is made with adapt silicon oil. Circuit can also be filled with fluorinated fluid, in case of strong oxidizing agents with which there is the risk of flammability or explosion.
- The selection of the diaphragm seal must be made according to **process conditions**: process media, temperature, working, minimum and maximum pressure, type of application.. Our technical staff is at complete disposal to suggest the best solution.

Repair service

Dedicated repair service for instruments supplied by us.

- Technical breakdown analysis
- Application analysis
- Evaluation and suggestion of technical solution

Other services

- Filling of the case with shock-absorbing oil suitable for the application
- Customized dials and ranges
- Mounting of manifolds on instruments

Certifications and awards

“Novara che lavora
e produce”

Award conferred by the Chamber of
Commerce for our 30 years of activity

Commercial
reliability certificate

Recognition based on the CRIBIS rating,
a dynamic and updated indicator on the
company's reliability

ISO 9001

ISO 9001:2015 quality certification, since
1998

Pressure gauges for pneumatic

Available also:

- plastic or metal case
- dn25 - 40 - 50 - 63 - 80 - 100 mm
- for non aggressive and non corrosive medias
- customized executions
- thousands of pieces ready in stock

Pressure gauges for process industry

Available also:

- anti-vibration execution
- several constructive materials available (wetted parts in brass, stainless steel, Monel, Hastelloy...)
- solid-front, heavy-work
- conform to many standards: ATEX, NACE...
- with electrical contacts
- differential
- with diaphragm seals

Diaphragm seals

Available also:

- connections: threaded, flanged, for food and sanitary applications, in-line
- in stainless steel, plastic, special materials (Monel, Hastelloy, Tantalum, Titanium, PTFE covered, others on request)
- assembly and replacement of diaphragm seals also on customers' instruments
- direct or remote mounting (with capillary) with filling fluid adapt to the application
- quick mounting and delivery service

Test gauges

Available also:

- mechanical test gauges with anti-parallax mirror band and knife edge pointer for optimal reading
- digital test gauges with battery: standard, with datalogger, with RS232 output and software
- accuracy classes : 0,6%, 0,25%, 0,2%, 0,1%, 0,05% and others on request
- we can supply them with calibration report and you can send them back to us for re-certification
- important stock available

- with threaded connection, with flushing diaphragm, with diaphragm seal
- ATEX execution, 3A execution
- output 4/20 mA, 0/10 Volt, HART protocol and many more
- pressure gauge with integrated transmitter
- many pieces ready for delivery

Instruments for sanitary applications

Available also:

- mechanical and electronic instruments for food and sanitary applications
- filling of the circuit with FDA approved mineral oil
- 3A compliant instruments
- F.C.M. compliant instruments
- ready in stock or customized solutions

Pressure and temperature switches

Available also:

- for relative or differential pressure
- standard or ATEX execution
- wetted parts in special materials
- mechanical or digital models
- pressure switches ready in stock, with diaphragm seal on request and set point already fixed in our laboratory

Thermometers

Available also:

- bimetallic, inert gas filled, glass tube
- for direct mounting or with capillary
- with electrical contacts
- for transformers
- ATEX and EAC executions

Temperature probes

Available also:

- thermocouples and thermoresistances
- standard or ATEX executions
- on request: 4/20 mA output
- on request: integrated display
- many solutions ready in stock, included connections, thermowells, and the possibility to get 4/20 mA output already set at the required values

Thermowells

Available also:

- tube or bar-stock thermowells, with threaded, flanged or weld-in connection
- many materials available (stainless steel, Inconel, Alloy, Hastelloy, Titanium, Duplex, Monel..) and coatings possible
- full penetration weldings and electropolishing
- 3.1 certificate, PMI test, penetrant liquid test, hydraulic tests up to 700 bar, welding tests with RX, solubilizations, heat treatments
- customized executions

Pressure and temperature calibrators

Available also:

- hand pressure generator pump, comparison pumps, deadweight tester
- thermostatic calibrators and baths
- verification, recalibration, repair

Accessories and flow rate control valves

Available also:

- valves, cocks and bar-stock manifolds
- pig tails, siphons, capillaries
- adjustable overload protection device
- dampeners
- flow rate control valves
- check valves

Solenoid valves

Available also:

- for liquids and gaseous fluids, for steam, for aggressive chemical products and contaminated fluids, for general uses
- in brass and stainless steel
- special materials on request
- miniaturized version
- ATEX execution for hazardous areas

Burkert official partner

Available also:

- solenoid valves and electromotive valves
- pneumatics and process interfaces
- process and control valves
- sensors, transmitters and controllers
- mass flow controllers

Regulators, filters, lubricators

Available also:

- pressure regulators
- filters
- lubricators
- groups
- relief valves
- decompression units, plants
- F.C.M. compliant instruments

Flow and level

Available also:

- level switches
- visual flow indicators
- flow switches
- flow meters
- level indicators
- chambers for level transmitters

Safety valves

Available also:

- safety valves for gases and liquids
- flanged, threaded or weld-in connections
- PED, ATEX, EAC certificates
- on request: external inspection from INAIL, RINA, TUV, ASME, DNV-GL..

Ball and butterfly valves

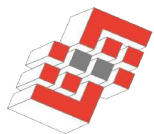

Available also:

- for water, gas, industrial applications
- manual
- with pneumatic or electric actuator
- with limit switch, positioner, solenoid valve
- special execution for high temperature and for food sector
- customized execution on request
